Power Service to Several Customers Interrupted

Power Service to customers in Dededo, Yigo, Agat, Harmon and Tamuning was interrupted from 6 pm to 9 pm tonight due to a shortage of power supply to meet the island's peak demand.

Two baseload units that supply up to 85 megawatts of power are off-line. Piti Unit 8 is off-line to convert its fuel source from residual fuel oil (RFO) to cleaner ultra-low sulfur fuel (ULSF). Cabras Unit 2, a 47-year old baseload generator, was tagged off-line last Friday to make a critical boiler tube repair. The Cabras unit is expected to return to service tomorrow, May 12th.

We apologize for the inconvenience and appreciate your patience tonight.
