3 Baseload units remain offline, loadshedding to occur tonight

GPA working on repairs to stabilize power system

(Fadian, Mangilao) - Today, 3 baseload units remain offline. Consequently, GPA will begin rotating outages lasting up to one hour starting later this evening. GPA is making every effort to provide sufficient power supply to meet the island's demand.

Piti 8 is anticipated to return to service on Monday, August 15, and Cabras 2 anticipated to return on-line by Wednesday, August 17. Once these units are operational, power interruptions should be minimal as supply will meet demand.

The loadshedding schedule is posted on GPA's website and social media pages including Instagram and Facebook. A loadshedding schedule is provided to assist customers to plan in case an outage may occur but does not mean a power interruption is imminent.

We ask everyone to please conserve energy most especially between the hours of 6pm to 9pm which is when power demand is highest and the time period loadshedding is most likely to occur.

We thank you for your continued patience.
