Cabras 2 unit back on line giving GPA sufficient supply to meet demand

Piti 8 unit came back on Thursday; Piti 9 unit still undergoing conversion

(Fadian, Mangilao) - This past Saturday, GPA's Cabras 2 unit came back on line after repairs to multiple boiler tubes. With Piti 8 unit also back on line along with Cabras 1 unit, GPA has the capacity to meet the power demands of the island, thwarting load shedding and power interruptions.

Piti 9 unit is still unavailable as it continues its conversion to ultra-low-sulfur diesel fuel, which will help meet USEPA requirements and reduce emissions.

We will keep our customers updated should changes in the status of our base load units occur.

Thank you for your continued patience and support.
